

DRY AND DUSTY.

But the Season of the Picnic is at Hand.

The Local Newspapers—Old Happenings Through the State—The Annual of Spring, Etc., Etc.

Chiggers are the coming season. The papers of southern Georgia are filled with glowing descriptions of burning bluffs and green trees. As nature begins to assume her garb of loveliness, spring fever forces men to river banks and cooling retreats. The hunters to seek the field of sport. One of these occasions was on the farm of H. C. Jones, in Harris county, in which a hunting party bagged one hundred and twenty-two doves. Dr. Cheney headed the list with twenty-four, Mr. T. H. Hadley with nineteen, and about a dozen others with less numbers. Thomasville hunters have so content themselves with clay pigeons, and in a recent test of skill at Grady park, eight gentlemen competed with twenty-five shots apiece. Judge Hopkins made the best record, scoring twenty-four out of a possible twenty-five. The next best was by Captain Barnes, who made seventeen hits.

Mr. J. W. Farlow, of Americus, is now the city editor of the Republican. Mr. Farlow has done some good work for the Constitution, and is thus qualified to make a successful city editor.

That farm life pays in Paulding county is illustrated by Mrs. W. A. Wood, of Brownsville, who has secured a bushel of last September's crop of butter, besides furnishing a family of nine persons. She sold at an average of 18 cents per pound.

It is not upon free trade alone that Colonel McIntosh, of the Albany News, can grow eloquent. He declares that there are "pets and pets," and then goes on to say:

One of the most rare pets, though, that we ever remember to have heard of, is a pet goose owned by Mr. Morris Woodcock, of this county. This beautiful bird is a cross between the common goose and a Chinese Toulouse goose. The iris of its eye is a bright and beautiful blue, and it has a most intelligent expression to its head. It follows Mr. Woodcock around like a dog, and courts attention from him. Whenever he condescends to stroke it gracefully around neck, it manifests every evidence of enjoying it, but he will not submit to the stroke of any hand but that of his owner, and has time and again manifested a violent spirit towards those who attempted to handle him. At the risk of some one saying, "birds of a feather flock together," we would like to own such an intelligent goose.

From six rows in his garden, one-half acre long, Mr. John L. Parker, of Thomasville, has made this season two barrels of choice flour. To the average wheat grower of the north and west this may sound large, but the proof can be produced. Parker's wheat is a cross between a hardy and a soft wheat, and is well adapted to the soil of this section. It is a cross between a hardy and a soft wheat, and is well adapted to the soil of this section. It is a cross between a hardy and a soft wheat, and is well adapted to the soil of this section.

The editor of the Thomasville Times is a lover of hatteracks. Last Sunday morning he sat down to a tender dish, and it was only when he recollected that it was the first of April that he understood the cotton stuffing in his favorite meal.

A young Walker county man has been arrested and placed under a bond of \$500 for forcing a preacher to take a drink out of a bottle at the point of a pistol.

A walnut tree in Mr. Whisenand's bottom in Habersham county, measures one foot in diameter at the base. It has been growing for many years, and is one of the largest of its kind in the county.

White Oak church, near Davisboro, is not without its sensations as was brought out by the marriage of Mr. Davis Wicker to Miss Blanche Cato. Mr. Wicker procured his license and went to the residence of his father-in-law several days ago, to carry off the young lady but failed. The father and brothers for some undefined reason objected, and ordered Wicker to leave, and also keeping the young lady under surveillance. Mr. Wicker, however, being a determined man, and Sunday morning, knowing the fair one would attend services at the church, resolved that he would marry her that day or perish in the attempt. Intimating his intentions to his friends and with their assistance, the bride and groom were kept in the church, while the young lady was carried off and concealed. After the services and while the brothers were looking in vain for their sister, Mr. Wicker in company with the parson made quite a detour, coming back to where the bride and groom were waiting, and in the stillness of the forest, with no shelter but the canopy of Heaven, with the birds caroling their sweet anthems in chord with the words of the minister, they were made man and wife.

The Covington Star objects to the dictatorship of Mr. Larry Gantt, who assumes to label the men whose names are on the list as democrats, and says that it is:

led to the conclusion that the selection of delegates to the St. Louis convention must be already agreed upon, and consequently, a "cut-and-dried" affair, and that the action of our state convention to be a mere formal matter to give color to the action of a clique—Mr. Gantt, perhaps, among the number—has been kept in the "fix up the State." In this matter, however, we think Mr. Gantt will find he is mistaken. The people of Georgia will be at the state convention, and their voice will be heard, no uncertain sound on the tariff question.

Says the Griffin News: Everybody has some vein of poetry in him, but in nine cases out of ten, it would be money in his pocket if that vein were filled with blood.

There are 3,000 members of the Farmers' Alliance working in Carroll county.

Seven county men are one of the most prominent in the state. Her farmers are prosperous and out of debt, and the people generally have quit dreaming and gone to work. They have just subscribed \$30,000 for the new railroad.

Captain Barnie Dart, of Brunswick, has a unique watch chain. It is a small row boat in miniature. He says it has an interesting history, and was made from a rock taken from the Baltic coast.

The mail boats along the Savannah river in Burke county come to the river, and the supply is simply inexhaustible. Its analysis shows it to be a pure and unadulterated material, containing eighty per cent of vegetable or plant food, and at the place where it is now being worked the matter is rather on the phosphate order and needs very little, if any, grinding or crushing. A fertilizer company in Augusta, recognizing the intrinsic value of these soils, has been transporting some of it to their works in Augusta, and have incorporated them in some of their formulas for the manufacture of fertilizer. It is thought if the proper arrangements can be made the company will erect a factory at Shell Bluff, as the facilities for loading it on board the boats for shipping cannot be surpassed.

The American Republican suggests a new business when it says:

"Marshall Lingo and Overseer Railroad are going into the business of raising snipe in the marshes north of the city. They have drained all the ponds over there and cleared up the undergrowth in order that they may have no difficulty in finding the old setting snipes and confining them in their nests during the hatching season."

The Covington Enterprise says that "should Captain Harry Jackson run for the legislature in Fulton county he deserves to be elected without opposition."

Mr. E. Harvey, of Eatonton, owns a \$25,000 watch. The watch is very valuable, and has been running many, many years. The Enterprise says if any watch is to know how this watch cost so much money, it can, by calculation, demonstrate the problem. Fifty-two years ago Mr. Harvey gave \$100 for the watch, and this amount compounded at ten per cent up to date would carry the sum to nearly, if not quite, \$25,000.

There is but little idea abroad of the extent of the timber business in the port of Darien. During the month of March, thirty-two vessels arrived in port and twenty cleared. There are now nineteen vessels in port loading with timber and lumber. Nine million feet of square and slab timber was measured at the public boom during the month, not counting several million feet of saw timber. Yachts are in port flying the flags of Norway, Denmark, the German empire, Great Britain, France, Spain and Greece.

It seems to be conceded that the Le Conte pearls are all killed.

Straw hats have made their appearance in Griffin, and Athens, and thus the dime novel mania has struck that town.

Cochran, though having a population of 1,500, has not got a Smith or Jones in the entire number; Jenkins, however, makes up for the deficiency.

The Danielsville Monitor says:

Last Friday afternoon a horse race was being run on the track at Danielsville. A man named John Smith was thrown out of the dirt, but not seriously hurt, while the other got under the seat of the buggy and did not fall at all. The two men who were picked up the child, and after brushing the sand out of her eyes, kissed her affectionately, thinking it was a white child, and John McKinzie made the same mistake. He took the other one in his arms and caressed it very tenderly, and stopped the chap from crying by filling his mouth with sweetened candy, remarking, "It is a wonder there were no killed." Willie McKinzie, who was very much excited, replied that God would always take care of the dear, darling little children.

A Sumter county farmer, who is indebted to a firm in America, which held a mortgage upon a pair of mules belonging to him, which he could not redeem, consulted a lawyer to know if there was not some way by which he could save his stock. The lawyer informed him that he could save his mules, but that he would be all right, as then his wife could homestead and thus save the mules, but otherwise there was no chance to help him. "Well," replied the young man, "I will get married, if that is the only way out of it, but I wonder there were no killed." Willie McKinzie, who was very much excited, replied that God would always take care of the dear, darling little children.

Near the line of Terrell and Calhoun counties, Mr. J. W. McMillan had a fight with an alligator a few days ago. This alligator was seven feet and three inches long, and fought gallantly with his tail until he was killed by being struck over the head a number of times with a fence rail. A portion of the rail fence in a line with the fight was thrown down by the force of the blows of the alligator's tail.

There is no fault to be found with the "patent outside" which are furnished the weekly press of Georgia. The true complaint is that the newspaper men relying upon the excellent matter that is furnished by the News-Press Union neglect the local fields, and the complaint is not against the outside, but the inside. When a county newspaper tries to cover the country between Kaukaukatka and Thibet it can expect nothing else but failure.

The record of one successful farmer in an out-laying Union district, who has been a great deal more interested in a local newspaper than an elaborate description of Abyssinian King John's last battle or a five-column editorial on the tariff.

A NARROW ESCAPE.

A Little Child Rescued by a University Student.

ATHENS, Ga., April 5.—[Special.]—What might have proved a very serious accident was averted yesterday by the timely rescue of a child from the hands of a steam locomotive. The child, a young girl, was playing on the tracks of the Georgia Railroad, near the Oconee bridge. A little child of the factory operators was playing on the tracks, and the locomotive was about to pass. The child, ignorant of its danger, was playing on the tracks, and the locomotive was about to pass. The child, ignorant of its danger, was playing on the tracks, and the locomotive was about to pass.

A SUDDEN DEATH.

Dr. Cosby Smith, of Wesleyan Female College.

Dies From an Attack of Vertigo—The News of the Central City.

MACON, Ga., April 5.—[Special.]—Dr. Cosby Smith died. This was the unexpected announcement that in a very few minutes dashed the life of the entire city. In a little while, sympathizing friends of the bereaved family gathered and comforted them.

At about half past nine this morning, Dr. Smith was seen at the depot, with one of the college girls, who was going to her home. At eleven o'clock he had returned to the college. A few minutes after his arrival, he complained of a severe pain in his breast. His wife, glancing at his face, was startled to see how pale and drawn it appeared. Shortly afterwards he felt a return of the pain, but not quite so severe. Thinking that he was suffering from the effects of indigestion, he remarked that he would go to bed and sleep awhile, and perhaps on awakening he would be feeling well, so he retired. He was lying on his back, and his wife was sitting by his side, when he suddenly died.

He grew weaker and weaker, all remedies being of no avail, and as it grew darker, a few gasps for breath, partially raising himself, and then fell back dead.

As a citizen of Macon, he has held the highest esteem of all. At the time of his death he occupied the chair of mathematics and astronomy. He was a most successful teacher. As a divine, he was a teacher, trained by the great teacher to labor in his vineyard. His life was a life of devotedness, and with that openness of character which has won for him the love of all who knew him.

Dr. Cosby Smith was sixty years old, born in 1828, in Green county. He graduated from Emory college in 1848, as valedictorian. He occupied the chair of principal of the Green county school system, and was principal of the school at Macon, Ga., from 1852, was called to the high and honorable calling which he held at the time of his death. He was a devoted husband and father, and was very much beloved by all who knew him. He was a devoted husband and father, and was very much beloved by all who knew him.

BITTEN BY A MAD DOG.

Alfred Bell Has a Hand-to-Hand Conflict With a Rabid Brute.

LEXINGTON, Ga., April 5.—[Special.]—Yesterday Alfred Bell, colored, living on Dr. Dave Darrow's place, six miles below Crawford, working in the field scattering guano, unconscious of anything near him, was suddenly attacked by a mad dog in his worst form. Alfred defended himself as best he could with the guano horn, until it was broken over the dog's head, which quickly crumbled him by the right eye, and he held the dog's head in this position they fell to the ground. The dog afterwards bit him on the forehead, making an ugly wound; also biting him on the left arm, and held it tightly till the other hands in the distance could be called up. They soon came and finally killed the dog. Alfred went to town, and had Dr. Willingham and Little to dress his wounds.

YESTERDAY Dr. W. M. Willingham's little daughter was bit in the hand by a dog, while returning from school.

AN UNNATURAL CALM.

The Drawing of the Grand Jury Causes a Simulation of Morality.

ATHENS, Ga., April 5.—[Special.]—The grand jury of Athens county has been drawn and will soon enter upon their labors. As a consequence an unusual calm has taken possession of the more quiet portion of Athens county. It is half past nine, and the grand jury are at the dinner table, and are again complaining of the return of the pains, also that it was difficult for him to breathe, and fell upon the bed unconscious. He was hurriedly summoned Dr. Bass. When they entered the room they found Dr. Smith lying upon the floor in a comatose condition. He was laid on the bed and medical assistance sent for.

He grew weaker and weaker, all remedies being of no avail, and as it grew darker, a few gasps for breath, partially raising himself, and then fell back dead.

As a citizen of Macon, he has held the highest esteem of all. At the time of his death he occupied the chair of mathematics and astronomy. He was a most successful teacher. As a divine, he was a teacher, trained by the great teacher to labor in his vineyard. His life was a life of devotedness, and with that openness of character which has won for him the love of all who knew him.

The Races at the Piedmont Park Draw a Crowd.

Frank Heddy's Gray Horse Wins Two Heats—Trotter Jones's Sorrel Takes the Race.

Nearly five hundred ladies, gentlemen and children drove out to the Piedmont park yesterday afternoon to see the races—running and trotting—and everybody came away thoroughly satisfied.

The races were fine. The gates were thrown open at one o'clock, and in a short time people began to come in. Some came by carriage and some by street car, but all found a pleasant reception awaiting them. The afternoon was pleasant and those who went out enjoyed the day. A brisk band occupied the stand and before the races began there was an abundance of music. The crowd upon the ground was almost wholly an Atlanta crowd, but every one was an admirer of horses.

Shortly before three o'clock the first horse came upon the track. It was a small sorrel named "Susie," owned by Mr. J. B. Heddy, and the saddle was a small one. The crowd was small, but the race was a good one. The crowd was small, but the race was a good one.

After Mr. Heddy's horse appeared other horses under saddle entered the ring and for a half hour the audience was entertained by the jockeys and racers as they went around the track exercising. At three o'clock the two trotters were led upon the track. "Trotter Jones's" gray came first, but before he had jogged around the course a time "Susie," the sorrel mare from Athens, made her appearance. The two trotters went around the track well in hand a half-dozen times. Then the bell tapped, and Captain Dave Wyle and Mr. Irwin, judges, came to the stand. The two trotters, "Trotter Jones's" and "Susie," were then started.

"Susie" in the hands of her owner, turned to face the starting point. A fine start was obtained and the horses went the first half in fine style. The gray leading all the way. He passed the judge's stand with "Hickey" a length in the lead, and went upon the second round under pressure. The gray continued to lead and around the track kept in front of his associate in harness a second time until the end was reached, when the judge announced that Hickey had won in 2:48.

The betting was against the gray, but his friends came out with yells and the band played, when the judges announced that the Georgia horse had won.

As soon as the two trotters went off the track the bell tapped again. This was for the running race, and when the jockeys came upon the course, an even half-dozen trotters were chopping the bits all ready to go. In the race were two blacks, two sorrels and two bays—one with a single eye. The runners were arranged upon the track, and at the tap of the bell secured a good start. One of the blacks, belonging to Mr. Heddy, secured the lead, and kept it to the finish. The crowd was small, but the race was a good one.

The mile dash was greatly enjoyed. Quickly after the run the trotters were rung upon the track again. Both came out in good shape, but as they passed the judges "Jim Hickey" went into a gallop and the judges and the crowd were greatly entertained. "Hickey" pushed up and then went by. The gray had a winning lick and kept it up until he started upon the home stretch. Then "Susie" began to show her heels, but she could not catch the lead, and Hickey's horse won the second heat by a length nearly 2:54.

Immediately after the last heat the judge started the horse upon the stand. He was started by Chuck Anderson at \$325 and went up to \$350 when he was knocked off by Mr. Anderson. "Susie" began to show her heels, but she could not catch the lead, and Hickey's horse won the second heat by a length nearly 2:54.

The third heat for the runners was won by Hickey's horse, and the race was over.

RELIGIOUS INTELLIGENCE.

Services in the Various Churches Yesterday and Last Night.

The revival meetings continue to attract large crowds. Dr. Jennings preached in the Central Presbyterian church yesterday afternoon and last night. He was heard by large and attentive congregations. There will be services again this afternoon and tonight at 7:30 o'clock.

The meetings at the Second Baptist church are growing in interest. Mr. Wharton is preaching the gospel with great power and simplicity. Large numbers are asking the prayers of God's people, and many have already accepted the Saviour. The people are much pleased with Mr. Wharton's preaching. His manner of presenting the gospel is attractive and the gospel as presented is proving the heart. The meetings continue as heretofore. Dr. McDonald and his people are expecting large blessings.

RED LIQUOR.

How the Counties are Paying for the Privilege of Selling It.

There is a great deal of red liquor sold in Georgia. And just at this time a number of counties are getting in their special taxes for the privilege of selling it. From this source since the last of April the sum of \$21,845 has been recorded in the controller general's office. The liquor taxes continued to pour in yesterday. Brooks county sent in \$188; Wilkes, \$204; Terrell, \$47; Muscogee, \$115; Cherokee, \$517; Carroll, \$282; Gordon, \$425; Macon, \$405; Clay, \$141; Dougherty, \$1,267; Union, \$352; Talbot, \$45; and Barrow \$3.65.

Pond's Extract. "The Vegetable Pain Destroyer." There is no pain or ache it will not abate, no bruise or burn it will not extract the agony from.

Jersey Butter at 30 cents per pound at Donohoe's.

J. C. HENDRIX & CO.

FLUSHED FACES AND WEAK BODIES.

Why so Many Americans at This Season of the Year Feel Dull, Stupid and Depressed—A Revelation of Importance.

"What an immense number of cases face you have in New York," said a prominent Englishman at the Victoria hotel recently. His impression was that Americans were great drinkers, but he did not realize that at this season of the year the lack of heavy and sluggish blood, which has been accumulating in the body during the winter, flushes the face, gives a dull, heavy feeling to the system, and interferes with both work and pleasure. The blood in the spring time is full of poison. Humors, acids, and various other blood-detracting substances are in the blood, and they must be removed or disease and death will be the result. It was formerly the custom of the grandmothers in the country to give the children liberal doses of sulphur and molasses to cleanse the blood in the spring time, but this has become an old-fashioned, and even foolish thing, for it does not cleanse the system. The most advanced physicians and scientists of Europe and also of America have sought for a simple and healthful remedy for thick, sluggish and poisoned blood, and from the mass of claimants Carbolic Water has pre-eminently taken the lead. It thins, cools, purifies and really renews the blood. Not only this, but it tones the system up in a powerful and natural way, and furnishes a natural remedy for bringing about natural health. The written statement of hundreds of the leading physicians of America could be far filled on this subject were it required, but it is generally admitted by the most prominent thinkers that although Carbolic Water has been known to the world for over a century, it is only now that it is becoming an efficient remedy for the various diseases of the blood.
